ABL BLAST LIGHT

LED blast hose mounting light ABL

The ABL blast light is designed for illuminating a working area during sandblast cleaning operations. The lamp runs on 12 volts and provides a bright concentrated light which can be directed at the working area. It utilizes an approximately 800-lumen bright LED module to produce a concentrated light cone.

The ABL blast light attaches to the sandblast hose and does not interfere with operation of the DMH handle. The operator does not have to hold the light in one hand in order for it to work effectively. The modern LED light runs on a 230V AC/12V DC transformer, supplied along with the package. The lamp has a hermetically sealed design and is protected against dust and abrasive material. A stable and replaceable deflector glass protects the lamp against abrasive material damage. The disposable glass can be easily replaced once the rubber cover is removed. The LED light is supplied with a 20m power cord.

Standard delivery

1. LED Blast light.

Lamp assembly with waterproof connector, spare part for 29004100 only.

2. Transformer.

AC/DC transformer, Input 230V~ AC, Output 12V= DC.

3. Power cord.

Extension power cord, 20m, with waterproof connectors.

Design features

800 lumens,
concentrated light
cone

Modern LED
technology

Mounted ABL light
will not interfere with
the normal operation
of DMH handle

Light housing is
specially designed for
blast hose mounting

Simple and fast
exchange of the
disposable glass

Technical data

Voltage (V input): 230V AC
Voltage (V out): 12V DC
Current (I out): ca. 1,5 A
Protection class: IP54

Order code	Model	Description
29004100	ABL	LED Blast light, approx. 800 lumens, included Lamp assembly with waterproof connector, AC/DC transformer, 20m. extension power cord with waterproof connectors
29004000		Lamp assembly with waterproof connector, spare part for 29004100 only
29004013		AC/DC transformer, Input 230V~ AC, Output 12V= DC
29004014		Extension power cord, 20m, with waterproof connectors
